Three ways to get a cake

Share facts by speaking. You do not know the organiser's limits.

MAKE IT YOURSELF
Ingredients: £12. Makes 12 portions.
Total preparation and baking time: 2 hours.

BUY READY-MADE
£20 per cake. Each serves 8 people. TWO in stock.
Collecting one or two takes 15 minutes in total.

HAVE IT MADE TO ORDER
£35 for 12 portions. Ready at 17:00 today.
Collection takes 15 minutes in total.

Find out what A needs

Ask about guest numbers, budget, deadline and available time. Explain the options. Agree a plan that fits every limit. Do not invent extra money, extra time, delivery or extra stock. Your teacher will supply any change.

Help if needed: How many people is it for? / What is the budget?
When do you need it? / How much time have you got?
We could buy ... / You could have ... made. / That would cost ...

Keep talking: choose a few

1. What is one job you prefer having done for you?

2. When is a ready-made item the best choice?

3. What would you like to learn to make or repair?

4. Tell us about a service you were pleased with, or invent one.

5. What would make a made-to-order item worth the price?

6. What would you do if an ordered item arrived late?

Follow an answer: Could you give an example? / Why?
What did you ask for? / What would you change?
