What Are the Advantages and Disadvantages of Online English Teaching?

S06E17 | For teachers to adapt to their learners

Purpose

Online lessons offer convenience, access and flexible use of digital materials, but teachers and learners may need to work harder on rapport, participation and attention. Whether online or face to face works better depends on the people, goals and context.

Try this in your next lesson

Can the learner hear and see what they need?

Our suggested routine

☐ Can the learner hear and see what they need?

☐ Is there a clear place for shared notes?

☐ How will the learner actively respond?

☐ Am I talking more because the screen feels quiet?

☐ Have I planned a change of pace?

☐ What happens if the connection fails?

After the attempt

What worked? What needs another model or a smaller step? Note one change for next time.
