

How Can Teachers Use Notes to Help Learners Remember English?

S06E14 | For teachers to adapt to their learners

Purpose

Notes become useful when learners return to them, retrieve the language from memory and use it again. A notebook full of explanations is not automatically a learning system. The important part is the revisit.

Try this in your next lesson

Choose five old language items.

Our suggested routine

Use the review to discover what needs another encounter, rather than measuring progress by how tidy the notes look.

- ☐ Choose five old language items.
- ☐ Cover the explanation or example.
- ☐ Try to remember the meaning or form.
- ☐ Say one new sentence with each item.
- ☐ Circle anything that still feels uncertain.
- ☐ Bring one question to the next lesson.

After the attempt

What worked? What needs another model or a smaller step? Note one change for next time.
